## HashSet in Java

```
import java.util.HashSet;
import java.util.Iterator;
public class Hashing {
      set.add(2);
       if(!set.contains(6)) {
      set.remove(1);
          System.out.print(it.next() + ", ");
```

```
System.out.println();

//isEmpty
if(!set.isEmpty()) {
    System.out.println("set is not empty");
}
}
```
